

# **Team 5 Readme**

## **Team Members**

Luke Harper

Nick Chiasson

Colin Zeidler

## **Environment**

- Microsoft Visual Studio 2012 Ultimate
- Qt Framework
- C++

## **Accessing Source Code**

1. Launch the VM
2. Launch Visual Studio 2012
3. In recent projects select MagicRealm
4. Source code is in three sections: CommonLibrary(shared data), MagicRealm(client), Server(server)

## **Start Program**

1. Launch the VM
2. Launch Visual Studio 2012
3. In recent projects select Magic Realm
4. Launch the server:
  - a. Right click on the Server subproject
  - b. Select debug
  - c. Select start new instance
  - d. Type 1 for cheat mode, 0 for normal
5. Launch the client
  - a. Right click on the MagicRealm subproject
  - b. Select debug
  - c. Select start new instance
  - d. (repeat for up to 6 clients)
